

To whom it may concern.

Subject : Interchangeability of Hy-Lok Tube Fittings

This letter is to clarify our position regarding intermixing Hy-Lok tube fittings with Parker A-Lok tube fittings.

The Hy-Lok tube fitting was designed specifically to be totally intermixable with Parker A-Lok tube fittings. We understood that to give the customer a viable cost saving alternative, we had to design a product that could be used and intermixed in all sizes, while giving the customer equal or superior performance. We offer a direct replacement fitting with no worries about intermixing components, existing inventories, or retraining installers.

Our position is supported by the enclosed documents, which have been certified independently by ICI Tracerco, UK. In fact we offer as much as same lifetime warranty on components intermixed with Parker A-Lok that we offer on complete Hy-Lok tube fittings.

Thank you for your interest in Hy-Lok and please let us know if any further clarification is required.

Sincerely yours,

Hy-Lok Corporation
